Tyran “Sheds Light” on the Future of Electricity Production – 05.23.08

Holland, MI - To explore what technologies need to be in place for creating power in the future with inevitable restrictions on the amount of carbon emissions allowed, the Holland Board of Public Works hosted a public discussion on Thursday, May 22nd at the Haworth Inn and Conference Center. There were many questions and quite a few answers, leading to everyone’s gears turning around what it will take to power the country in the year 2030.

Additional information about Ms. Tyran’s presentation may be found at www.hollandfutureenergy.com under News.
